The Barran Dodger Archive: A Structured Analytical Report

On the 2,304-Exhibit Record Documenting Alleged Persecution of Dr. Richard William McLean

I. Methodology, Scope, and Limitations

This is a **preliminary structured report based on publicly accessible summary pages, index pages, and selected self-published source documents** associated with the Barran Dodger archive. It does **not** constitute an analysis of the actual 2,304 exhibit files themselves. The archive's full exhibit manifest, individual SHA-256 hashes, chain-of-custody records, and forensic AI methodology were not independently accessed or audited for this report.

Sources reviewed: barrandodger.com, economic-justice-engine.replit.app, barrandodger.com.au, Medium (10+ articles), Scribd (6+ documents), and Apple Books (2+ publications). These sources represent the archive's public-facing summaries, named-parties directories, and selected primary documents rather than the complete exhibit collection.

Key limitations:

- All claims are presented as **allegations made by the archive author** (Dr. Richard William McLean / Barran Dodger). They have not been independently verified.
- The archive's technical verification claims (SHA-256 sealing, blockchain timestamping, forensic AI analyses) are reported as stated by the archive and have not been independently audited.
- No claim in this report has been confirmed by judicial finding, criminal conviction, or institutional investigation as of the date of this report.
- Throughout this report, phrases such as "the archive states," "the archive alleges," or "allegedly" are used to signal that the information originates from the archive's self-published materials.

II. Executive Summary

This report analyses the public-facing materials of the Barran Dodger archive — a collection that the archive states contains 2,304 SHA-256 sealed exhibits, maintained by Dr. Richard William McLean, who publishes and operates under the pseudonym "Barran Dodger." The archive, hosted across barrandodger.com, economic-justice-engine.replit.app, Medium, Scribd, and Apple Books, purports to document 35 years of systemic persecution by 35+ Australian government agencies and named individuals. The archive states that its collection includes 788 freely distributed PDFs, 891 Bitcoin blockchain timestamps, 73 independent forensic AI analyses (assessing 603 propositions across 55 reviews with what the archive reports as zero contradictions), and over 502,000 verified downloads across six continents. All claims documented below are allegations presented by the archive author. No court has entered a final judgment or criminal conviction against any named party in connection with these allegations.

VII. Summary of Claim Areas

A. Financial Sabotage

The archive alleges a coordinated campaign of economic destruction spanning 35 years, operating through multiple mechanisms:

1. Employment Denial

- 35 years of alleged APS employment denial, confirmed in writing by Federal Court General Counsel Scott Tredwell on 27 March 2023. The "Chronic Schizophrenia" diagnosis allegedly functioned as a barrier to security clearances, professional registration, and creditworthiness. Cited economic impact: $4.09M–$28M.

2. Financial Guardianship Control

- NSW Trustee and Guardian held financial guardianship for 12+ years through officer Phillip Glass. Alleged conduct includes: ignoring crisis calls, withholding funds, charging management fees from McLean's own funds, making property decisions without knowledge, and continuing to assert financial control after receiving a legal cease-and-desist order and after McLean's relocation outside NSW jurisdiction. Cited legal violations: Guardianship Act 1987 (NSW), Crimes Act 1900 (NSW) s.192E (fraud by deception), UNCAT Article 16.

3. NDIS Fund Withholding

- Sukhi Tear, registered NDIS support coordinator, allegedly sat on $48,000 in approved Core Supports while McLean was homeless. NDIS payments allegedly frozen or denied despite approved plans. AblePoint Australia allegedly failed to provide approved SIL (Supported Independent

Living) housing. Total denied settlements alleged at $2.2 million, including $1.1 million in WorkCover rejections and $300,000 in medical malpractice claim rejections.

4. Business Destruction

- Micron21 allegedly destroyed McLean's IT consulting business, including goodwill, client base, contracts, personal data, and future earnings. Valued at $1.35M–$4.1M based on EBITDA multiples.

5. Alleged NDIS Embezzlement

- Sukhi Tear allegedly embezzled $50,000 in NDIS funds. Police Report PD77027 associated with five missing-person registrations during the relevant care period. Accrued damages estimated at $112,422–$262,422.

6. Suppressed Economic Claim

- A $112.8 million economic claim allegedly suppressed because a mental-health-history strategy (attributed to the Office of the Minister for NDIS) caused McLean to be treated as a mental-health case rather than a protected disclosure holder.

7. ASIC Fraudulent Registrations

- 350+ allegedly fraudulent registrations referenced in connection with ASIC. No further detail on specific registrations, dates, or financial impact provided.

B. Psychiatric Weaponization

The archive alleges the systematic misuse of psychiatric diagnosis, involuntary hospitalisation, and mental health labelling as instruments of silencing and control:

1. Involuntary Hospitalisations

- 14 involuntary psychiatric hospitalisations across NSW, Victoria, and Queensland over the 35-year period. Described as blockchain-sealed exhibits in an ICC Article 7(1)(h) filing for persecution as a crime against humanity. The "Chronic Schizophrenia" label allegedly applied through forced detention rather than voluntary diagnosis.

2. Diagnostic Label as Economic Weapon

- The schizophrenia diagnosis allegedly functioned as an "economic eraser," affecting security clearances, professional registration, creditworthiness, and social capital. The ABS is cited as documenting that individuals with psychiatric histories earn 38%–62% less than comparably qualified people without such histories.

3. NDIS Mental Health Strategy

- A strategy allegedly coordinated through "Ben from NDIS Help" under the authority of the Office of the Minister for NDIS, which allegedly weaponised McLean's mental-health history to suppress his whistleblower testimony. The strategy allegedly treated McLean as a mental-health case rather than a protected disclosure holder, rendering a $112.8 million economic claim invisible. Linked to PID Act 2013 s.10, ICCPR Article 19(2), and ICC Article 7(1)(h).

4. Psychiatric Incarceration as Housing Weapon

- Police reports allegedly document law enforcement overseeing the destruction of McLean's belongings by his landlord while he was confined in a psychiatric hospital, rendering him

homeless during medical confinement.

5. Familial Authorisation of Institutionalisation

- Bruce McMaster (uncle) allegedly participated in authorising a "48-month psychiatric death sentence" — four years in a psychiatric prison. Family allegedly told that isolating McLean was "for his own good."

6. Voice-to-Skull (V2K) Technology Claims

- McLean alleges subjection to V2K technology, described as "covert auditory torture using directed energy weapons." The archive cites declassified government documents and patents as evidence that such technology exists. This claim is presented as psychological warfare consistent with documented intelligence agency tactics. No independent verification of V2K deployment is provided.

7. Clinical Death Event (2021)

- In early 2021, McLean allegedly experienced a clinical death event inside Werribee Mercy Hospital, a Victorian government psychiatric facility. Stated survival margin: 2.87% (97.13% probability of death). Characterised as "attempted murder by institutional negligence at minimum." The institution has not been charged; the government has not acknowledged the event. Valued at $4.9M–$7.6M under the OBPR Value of Statistical Life framework.

C. Assassination Attempts and Death Threats

1. Clinical Death Event as Attempted Assassination

- The 2021 Werribee Mercy Hospital clinical death event is characterised as an attempted assassination through institutional negligence. No specific individual is identified as having attempted to assassinate McLean. The archive states: "When the 14 hospitalisations allegedly failed to kill him, he was left in a facility where he nearly died."

2. Tory Kilbourne Death Threat

- Tory Kilbourne allegedly issued a recorded death threat against McLean. The threat was:
  - Preserved as a blockchain-authenticated primary-source exhibit
  - Submitted to Wyong Local Court (Receipt I88267509)
  - Listed for hearing on 14 May 2026
  - Submitted to the Attorney-General's Office under reference MC23-028244
  - Filed with the ICC under Article 7(1)(h)
  - Filed with OHCHR and NSW Police
- The AFP's documented non-response to the death threat is listed as a primary source exhibit.
- No conviction or final court finding has been recorded.

3. Alleged Contracted Killers

- McLean alleges that his NDIS provider reported that "two contracted killers were arrested." No identities, dates, charges, or police report numbers are provided for this allegation.

4. Tony Ridley Threats

- Tony Ridley allegedly stated to McLean: "We've thought of everything" and "You're going to die, Richard." Ridley allegedly tracked McLean's movements using vehicle GPS trackers installed "in collusion with Federal Police" and followed him interstate to Adelaide. Described as "military-grade PSYOPS against a disabled man with a dog."

5. AblePoint Australia Failure to Act

- An AblePoint Australia CEO was allegedly recorded acknowledging an active death threat against McLean (an NDIS participant) and failing to act. Linked to Work Health and Safety Act 2011 s.19 (primary duty of care) and NDIS Act 2013 s.73ZP. The recording was submitted to the NDIS Quality and Safeguards Commission, ICC, and UNHCR.

6. Five Missing-Person Registrations

- McLean was reported missing five times across NSW, Victoria, and Queensland (Police Report PD77027). The archive alleges this is connected to the broader campaign of silencing, institutionalisation, and attempted erasure.

7. Port Macquarie Incident

- Referenced as the location of an alleged assassination attempt involving Federal Police and McLean's provider. No date or further detail provided.

Notes on the Matrix

1. **Document identification**: This matrix catalogues documents identifiable from the archive's public-facing materials. The archive states it contains 2,304 exhibits; the 95 entries above represent those that can be specifically named or described from publicly accessible sources. The remaining exhibits are not individually described in the materials reviewed.
2. **Date availability**: The majority of documents (83 of 95) lack specific dates in the publicly accessible sources. Dates are identified for 12 documents only.
3. **Source attribution**: Each entry includes the source URL from which the document was identified. Many documents are referenced across multiple sources.
4. **Claim area mapping**: Documents are mapped to three primary claim areas — financial sabotage, psychiatric weaponization, and assassination attempts — with some documents supporting multiple areas.
5. **Legal framework coverage**: Where a legal framework is specifically cited in connection with a document, it is noted. Many documents do not have a specific legal framework cited in the sources reviewed.
6. **Internally referenced sub-documents (Section I)**: These are titles referenced within the archive's essays with page numbers but were not individually accessed. They may be section headings, internal exhibit titles, or separate documents within the broader collection.

XI. Key Observations

Claims Not Independently Verified

The archive presents extensive allegations but does not provide evidence of:

- Any criminal conviction, court judgment, or formal judicial finding against any named party
- Any ICC, OHCHR, or UNHCR response confirming investigation or acceptance
- Any independent audit of the 2,304 SHA-256 sealed exhibits or the forensic AI methodology
- Any confirmation of Tony Ridley's military or intelligence affiliation
- Any confirmation of Steve Iasonidis's ASIO employment
- Any police confirmation of the "two contracted killers" arrest allegation
- Any formal NDIS Commission finding against Sukhi Tear or AblePoint Australia

Structural Patterns in the Archive

1. **Self-published across multiple platforms**: barrandodger.com, barrandodger.com.au, economic-justice-engine.replit.app, Medium (10+ articles), Scribd (6+ documents), Apple Books (2+ publications)
2. **Blended formats**: The archive combines primary-source documents (hospital records, FOI retrievals, court filings) with creative/literary works (satirical confessions, gospel-style texts, prophetic declarations) and economic valuations
3. **Absence of defamation proceedings**: The archive states that no named party has initiated defamation proceedings or produced a factual rebuttal
4. **Agency non-responses as evidence**: The archive systematically characterises each government agency's failure to respond as "itself a primary source exhibit"
5. **Economic quantification**: The archive applies formal valuation frameworks (OBPR, EBITDA multiples, comparable case law) to produce aggregate liability estimates of $58.6M–$257.3M
